A fine wire attached with exaggerated trails, and every day thereto is made to surround two small cores of soft iron. As the electric wave, produced by a few pieces of copper and zinc at Valentia, passes through the wire, these cores become magnetic enough to attract a light iron bar. On this tiny glass a lamp is made to glare, so that its light is reflected on a tablet on the wall. The language of the cable is denoted by the shifting of this reflected light from side to side.
